WORK EXPERIENCE

Quadrant Televentures Ltd. (Connect Broadband)

June 2026 – July 2026

Network Operations Intern

- Monitored live ISP network infrastructure and assisted in troubleshooting production network issues.
- Worked with IPv4 subnetting, VLAN segmentation, and enterprise network architecture.
- Gained practical exposure to broadband provisioning, telecom infrastructure, NOC operations along with compliance requirements.

EDUCATION

Bachelor of Engineering in Electronics and Communication

August 2024 – June 2028

Thapar Institute of Engineering and Technology, Patiala, India

SKILLS SUMMARY

Programming Languages: Python, C, C++, TypeScript, Bash

Cybersecurity: Penetration Testing, Vulnerability Assessment, Network Security, Web Application Security (VAPT), OSINT, Digital Forensics, Malware Analysis, Cryptography

Security Tools: Nmap, Metasploit, Burp Suite, Wireshark, Nessus, OpenVAS, John the Ripper, Hydra

Frameworks & Technologies: React, Next.js, Node.js, Git, REST APIs

Operating Systems: Linux, Windows

Soft Skills: Team Leadership, Problem Solving, Technical Writing, Project Management

PROJECTS

HexStrike – Automated Web Pentesting Tool — [GitHub Link](#)

- Designed and developed an automated reconnaissance framework for bug bounty hunting.
- Implemented subdomain enumeration, parameter discovery, endpoint fuzzing, and modular scanning workflows.
- Built resilient logic to handle inconsistent HTTP responses across different targets.
- Integrated multithreading to automate scalable reconnaissance tasks.
- **Tech Stack:** Python, Bash, Networking, HTTP Protocols

Quant – Custom Layer-1 Blockchain & Layer-2 Financial Platform — [GitHub Link](#)

- Designed and developed a custom Layer-1 blockchain in C++ featuring Proof-of-Authority consensus, peer-to-peer networking, wallets, and signed transactions.
- Built a Layer-2 financial platform with JWT authentication, portfolio management, and an AMM decentralized exchange.
- Implemented validator management, blockchain explorer APIs, tokenomics, and a blockchain-integrated gaming platform.
- **Tech Stack:** C++, Node.js, Express.js, SQLite, JavaScript, Networking, Cryptography

ACTIVITIES & CERTIFICATIONS

Capture The Flag (CTF) – Active participant across university, TryHackMe, and Hack The Box with multiple podium finishes.

Certified Python Programmer

June 2025

Certified Ethical Hacker (EC-Council)

June 2026
